Color display

These programmable iSeries controllers and panel meters for process voltage and current, strain, and temperature input include an LED display that can be programmed to change color between green, amber, and red at any set point or alarm

point. Available in $\frac{1}{16}$, $\frac{1}{8}$, and $\frac{1}{4}$ DIN, and a NEMA-4 display with 2.5-inch LEDs, iSeries devices also connect directly to an Ethernet network

and can even serve a web page displaying the process value or be reconfigured through a web browser over the Internet.
