THE MAGAZINE FOR MANUFACTURING AND DESIGN INNOVATION

Embedded Web Server Instruments

The iSeries devices connect directly to an Ethernet network with a standard RJ-45 connector and can send and receive data in standard TCP/IP packets. They can serve Web pages over an Ethernet LAN or over the Internet making it possible to monitor and control a process through a web browser from anywhere in a facility or in the world. The instruments include panel meters, controllers and signal conditioners. Other features include totally programmable color displays, full autotune PID control, and two control or alarm outputs. **NEWPORT Electronics, Inc.**, 2229 South Yale St., Santa Ana, CA 92704. 800-NEWPORT; www.newportUS.com
