## Web-Enabled Devices monitor and control from anywhere

iSeries controllers, panel meters, transmitters, and signal conditioners feature an embedded Web server. They connect directly to the Ethernet and

### Monitor & Control Your Process Through a Web Browser p. 56

Newport Electronics' panel meters, controllers, and signal conditioners boast an embedded web server. Now you can monitor and control your process through a web browser from any-where on the Internet.

**NED 2**

transmit data in standard TCP/IP protocol. You can monitor and control your process through a Web browser from anywhere in the facility or anywhere in the world. This is all accomplished without a computer. The devices (meter or controller) connect directly to the Ethernet Network—not to the serial port of a computer functioning as a “server” and “master” to “slave” instruments connected through serial communications.
