"EMBEDDED INTERNET" INSTRUMENTS

NEW iSeries devices are announced as the "first Web Enabled controllers, panel meters, transmitters, and signal conditioners."

They connect directly to an Ethernet network with a standard RJ-45 connector to send and receive data in standard TCP/IP packets.

New iSeries instruments can serve Web pages over an Ethernet LAN or over the Internet. This enables monitoring and control of a process through a web browser from anywhere in a facility or worldwide. Further details are free.

NEWPORT Electronics Inc., 2229 So. Yale St., Santa Ana, CA 92704-4401.
