

For engineers who specify cooling equipment, components and materials.

# PROCESS COOLING & EQUIPMENT

November ■ December 2000

## Cool Products

### Web-Enabled Controls

Circle  
219

When connected to an Ethernet network, iSeries controllers, panel meters, transmitters and signal conditioners allow a user to monitor and control a process through a web browser. Controller can send an e-mail to a specified engineer alerting of alarm condition or to update status. Data is sent and received in standard TCP/IP packets. From Newport Electronics Inc., device has embedded Internet capability, and each is assigned an individual IP address.
